ABOUT ME

Born and raised in Italy, always been a technology lover.

Slackware enthusiastic since much younger, that's what pushed me to the passion against open source and GNU/Linux where I could also contribute to some open source projects.

I love reading and writing, even documentation.

I'm an open-minded, fast learner, positive person who also appreciates friendship and sense of humour.

WORK EXPERIENCE

AXS Europe, UK. (2017 - now)

Senior System Operations Engineer in AXS. I am responsible for building and maintaining infrastructures, monitoring, operational availability of instances, containers, databases, network, security and applications availability. I am responsible for building and modernizing deployment pipelines. I am on a incident management rota for global incident management. I am part of a team of 4 people, which drastically extends on international projects.

AXS Europe (Outbox partnership), UK. (2016 - 2017)

Application Support Engineer, in a team of 4 people. The job was mainly focused on maintaining multi-service python applications across Europe, United States and Africa. Many of the tasks included write operations on Oracle and MSSQL database, debugging python code and automating manual tasks as much as possible.

SoluzioneWeb, Italia. (2015 - 2016)

SoluzioneWeb was a small family company created for providing solutions to small business, such as creating websites, software or repairing computers.

SISPI SpA & OrCOM srl, Italia. (2013 - 2015)

I was an intern for the above two companies, sponsored by my high school. I had the opportunity to face the enterprise world. I could maintain Oracle databases, develope scripts in bash, monitor the systems, talk about tech.
